

Assessing source contributions
to air quality and noise in
unconventional oil shale plays `

Research Team

Meredith Franklin (USC, UToronto)

Gunnar Schade (TAMU)

Jill Johnston (USC)

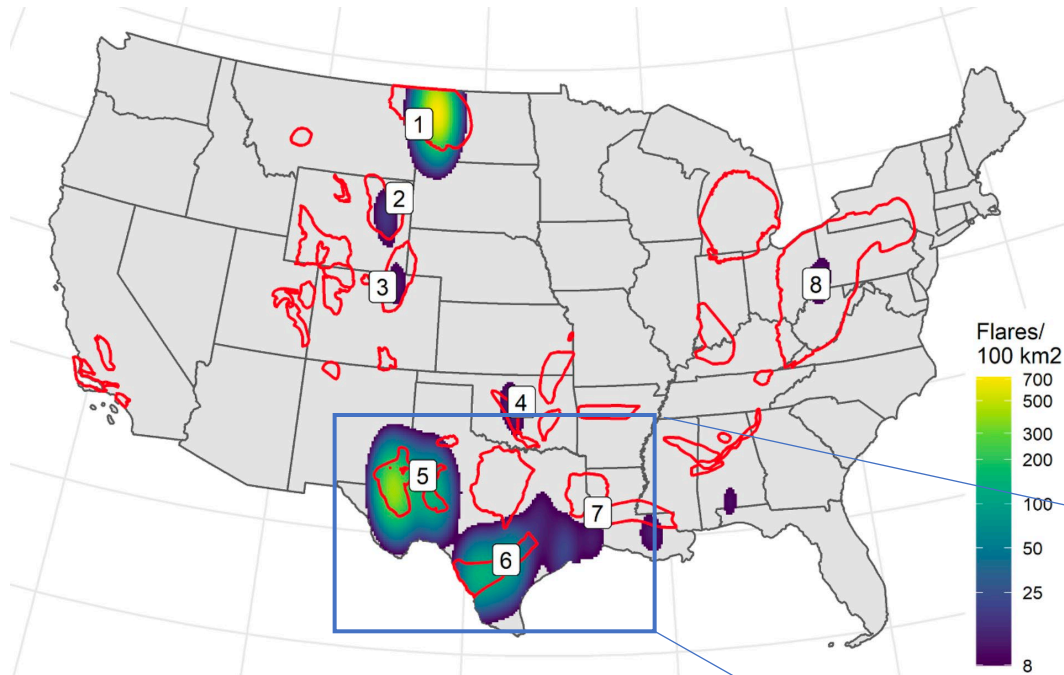

Detlev Helmig (BoulderAir)

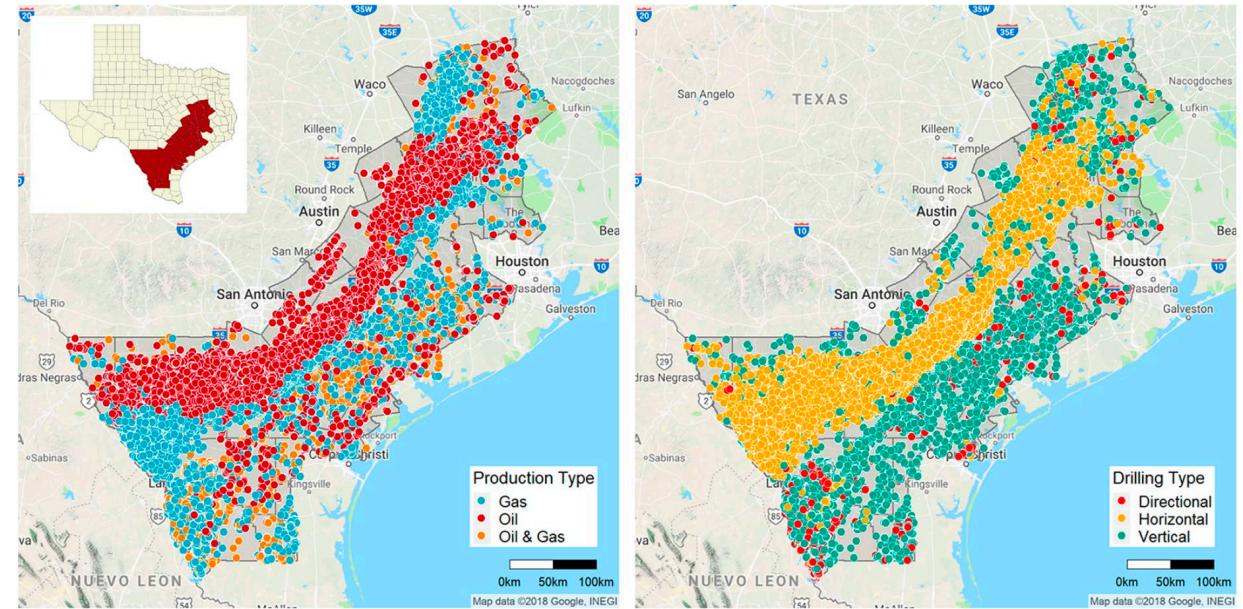

Lara Cushing (UCLA)

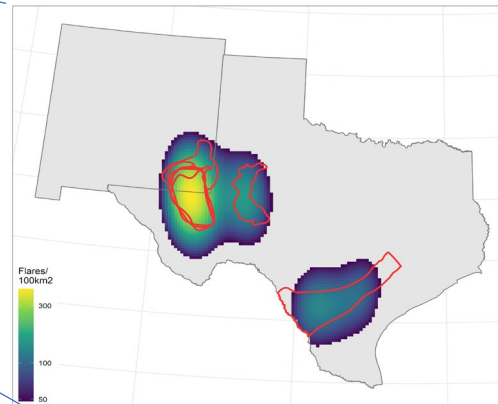

Study Motivation

UOGD flaring density

UOGD well locations in Eagle Ford

UOGD flaring Permian and Eagle Ford

Study Objectives

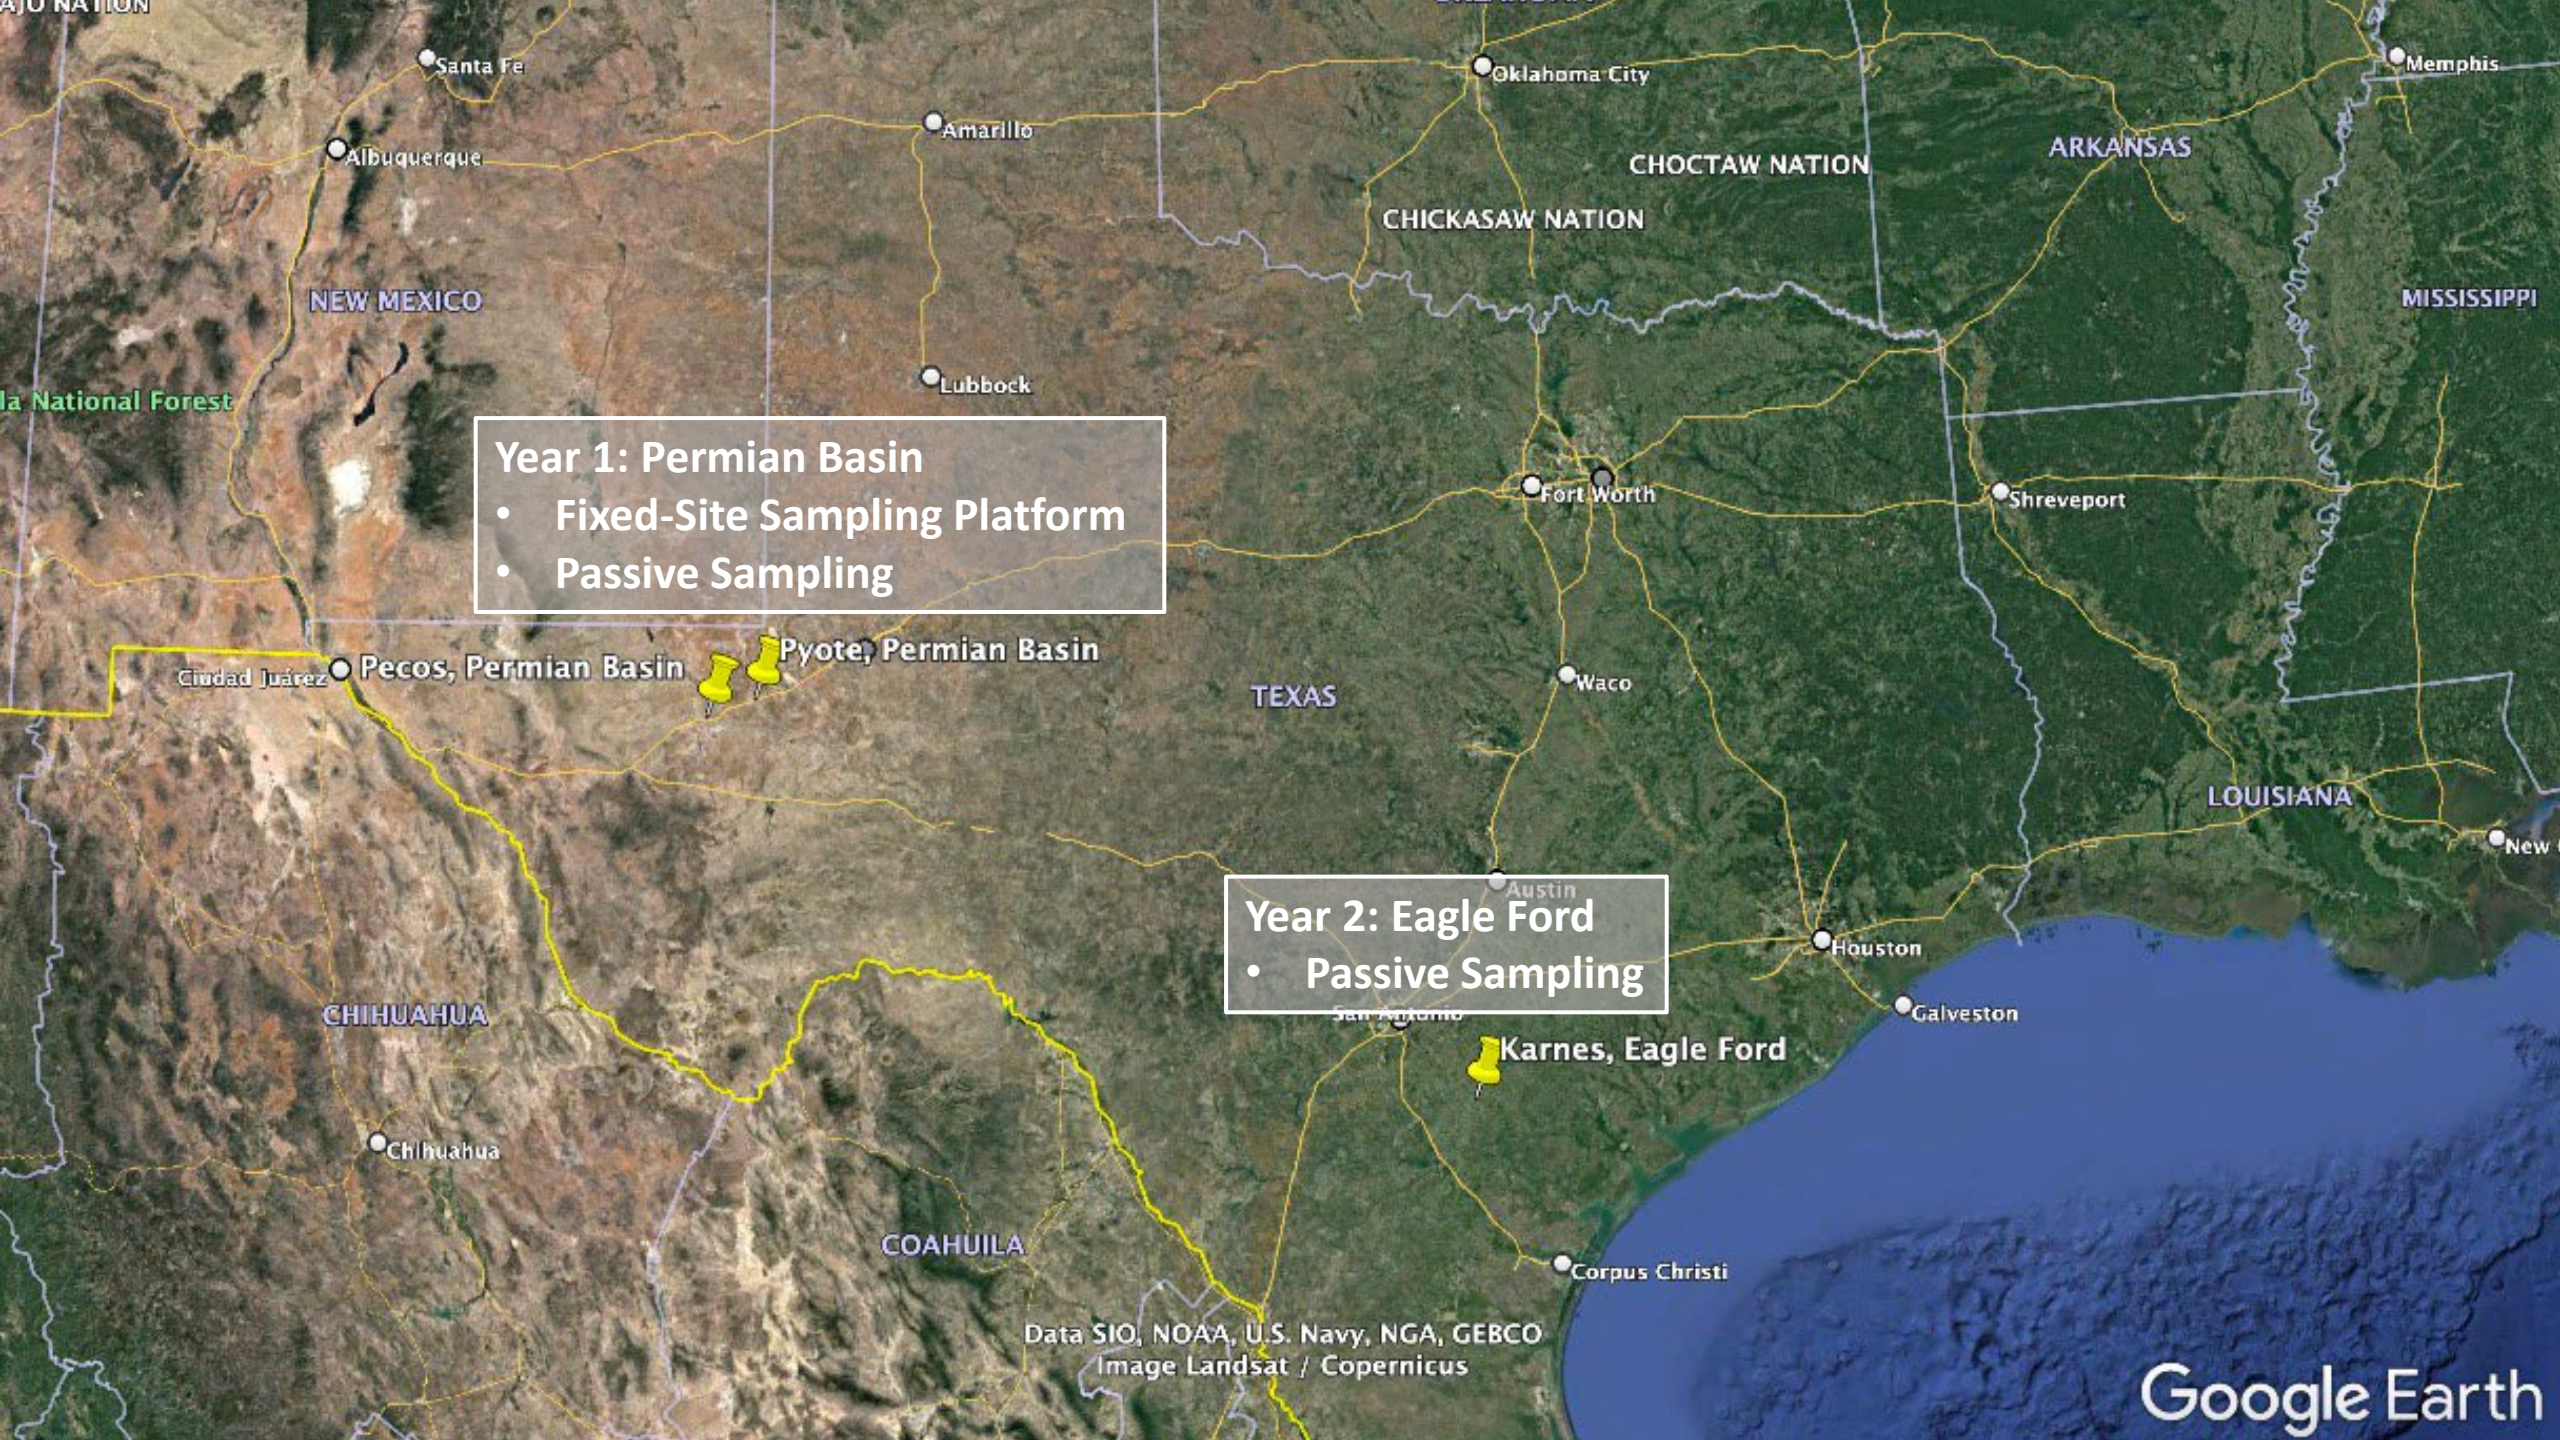

- Our study is designed to better understand emissions and population exposure to air pollutants and noise coming from Unconventional Oil and Gas Development (UOGD)
 - 1) Use fixed-placed, active air quality monitoring to characterize the emissions and impacts from UOGD
 - 2) Use distributed, passive sampling to understand the potentially uneven distribution of selected toxic air pollutants
 - 3) Focus on UOGD related flaring by combining our measured data with satellite observations

Year 1: Permian Basin

- Fixed-Site Sampling Platform
- Passive Sampling

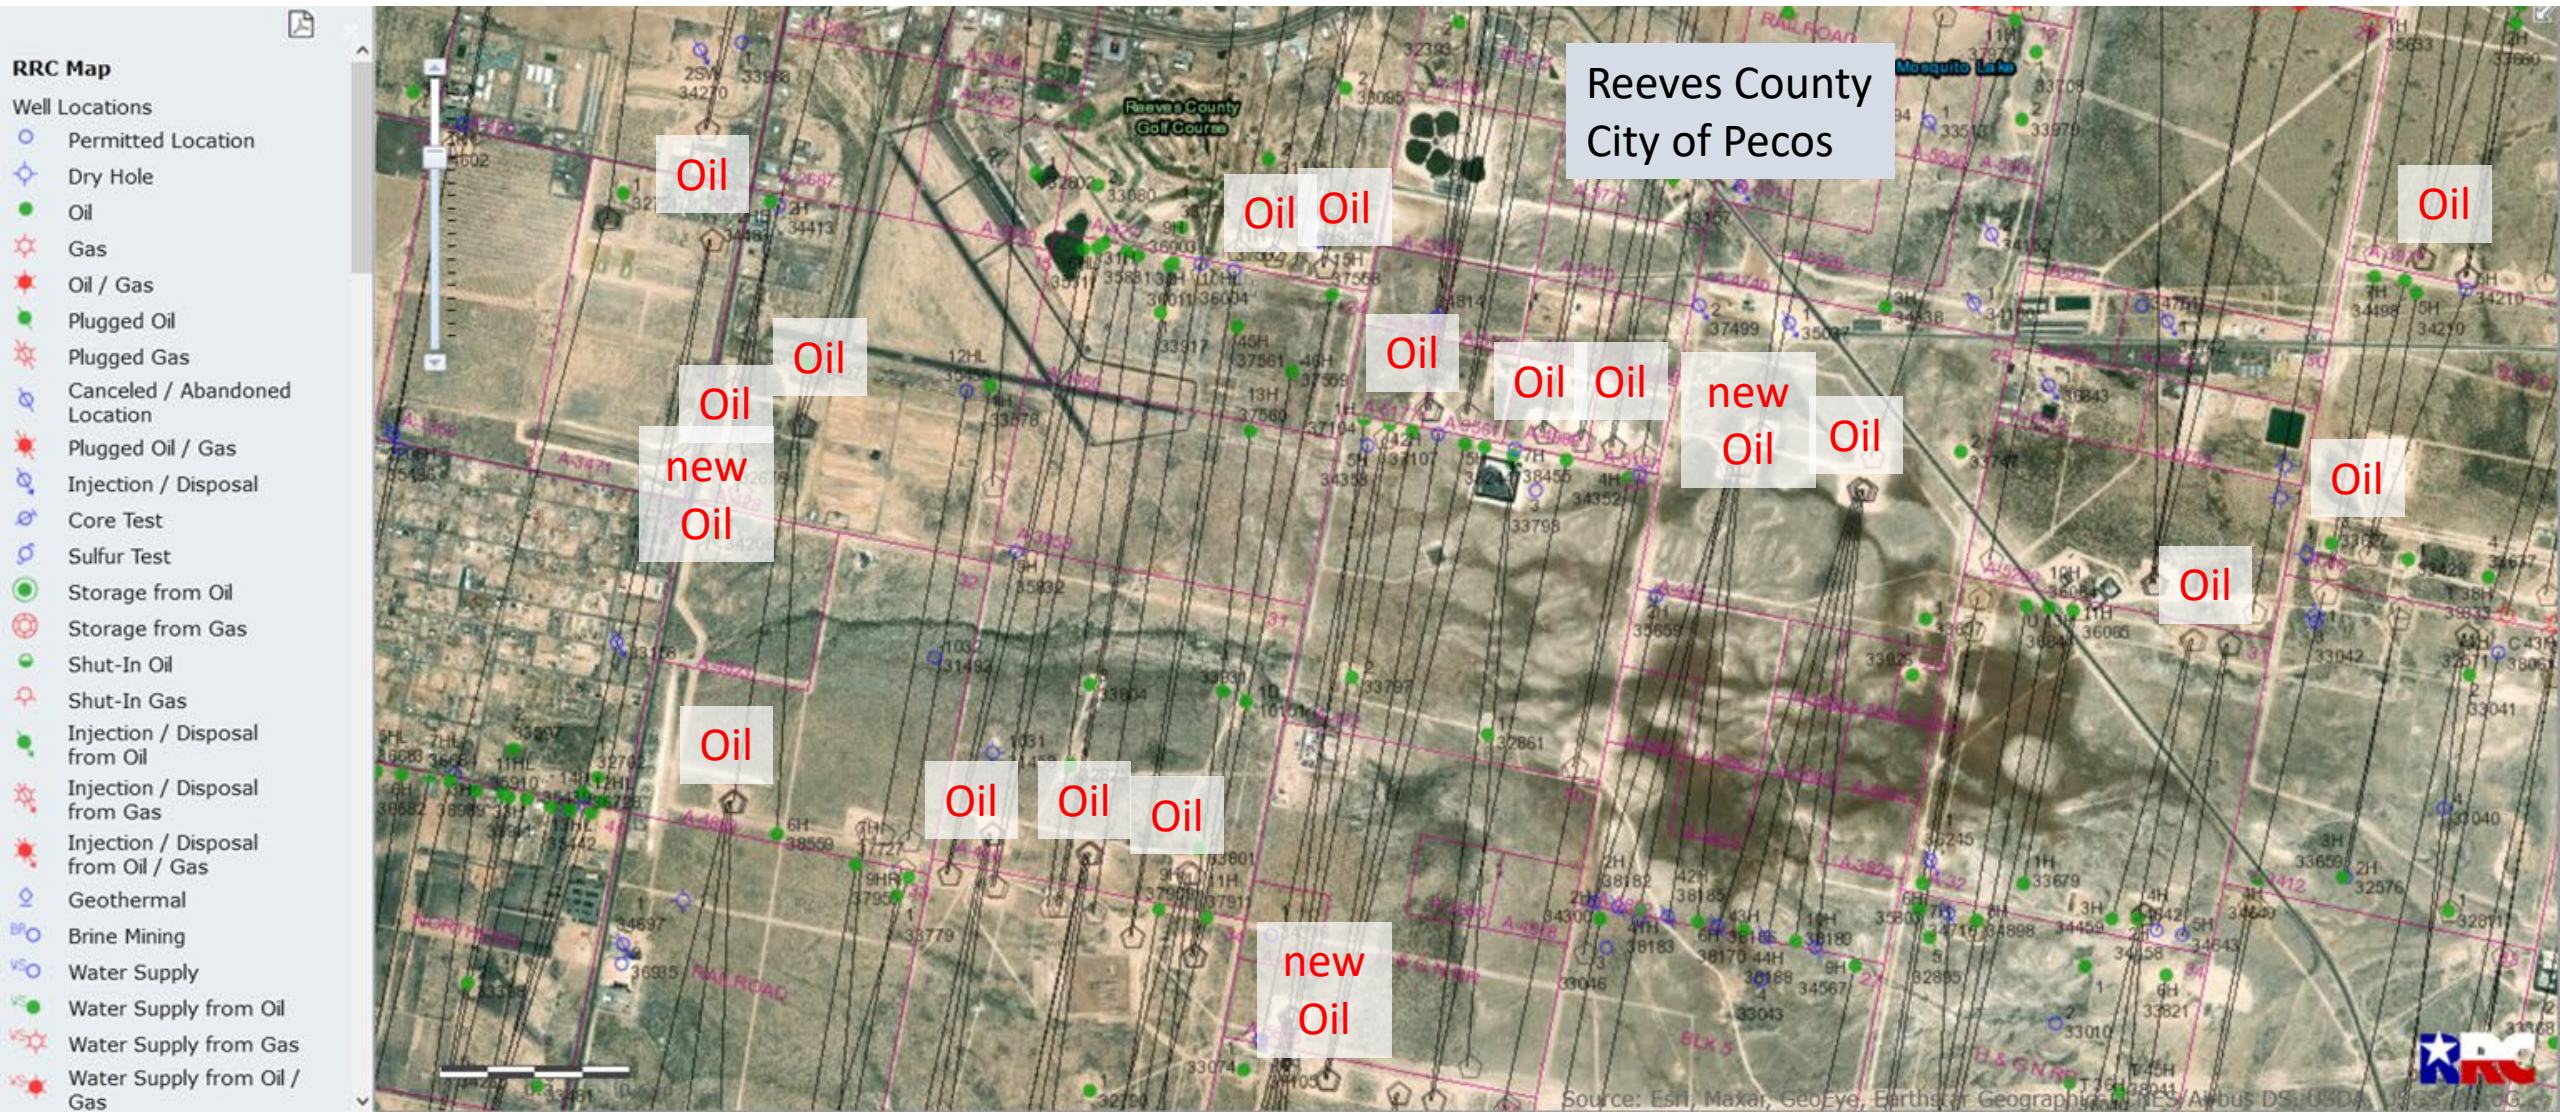

Year 2: Eagle Ford

- Passive Sampling

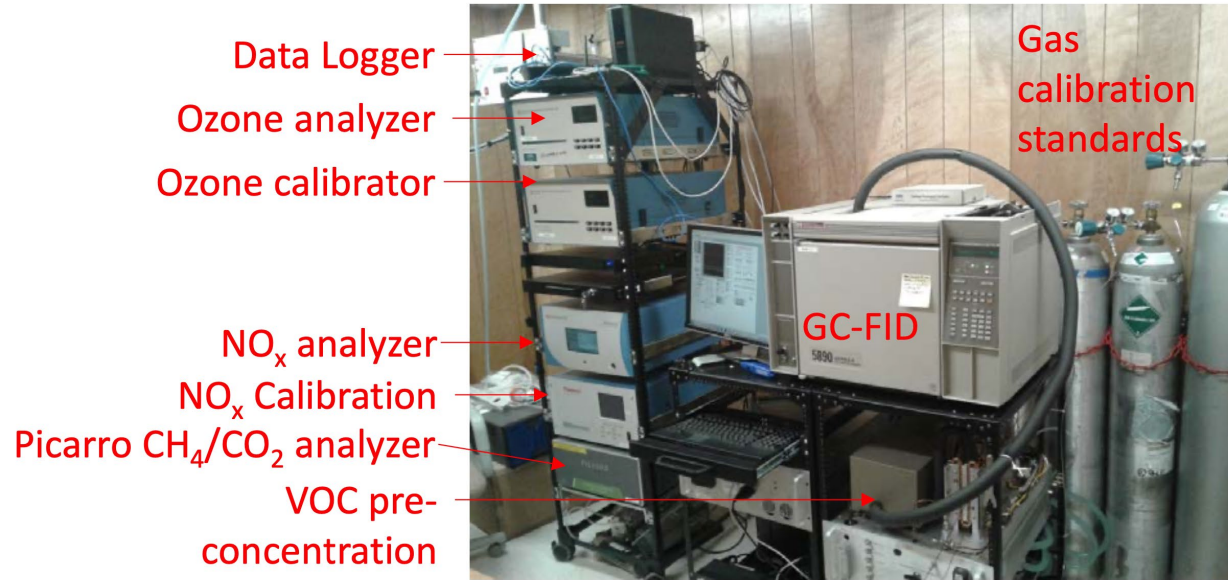

Data SIO, NOAA, U.S. Navy, NGA, GEBCO
Image Landsat / Copernicus

Possible fixed location Sampling near City of Pecos, Permian Basin

Fixed Location Sampling Platform

One-year deployment in Permian – continuous 24/7 monitoring

- Air pollutants (ozone, methane, CO₂, carbon monoxide, nitrogen oxides, hydrogen sulfide, sulfur dioxide, volatile organic compounds, PM_{2.5}, black carbon)
- Noise
- Radioactivity
- Meteorology

Distributed Sampling – Permian and Eagle Ford

6-8 months in each Permian Basin (2022-23) and Eagle Ford (2023)

- Air pollutants: selected (toxic) hydrocarbons
- Temperature

Distributed Sampling Volunteer Recruitment

- We are actively looking to recruit volunteers for distributed, passive sampler placement
 - work with local, community-based organizations and residents
 - land-owners
- Selected volunteers will be trained individually or in a group and a video will be circulated
- Communication between volunteers and research team will be key
 - social media usage
- Volunteers will receive a \$50 gift card upon completion of the sampling period
